

GREAT AGENT

- Roleplay: helps the agent become specialist on the subject that it's projected for.

- ~~Agents focus on what makes an agent~~

- Focus: an agent focused on only one context, focused in one goal, and also in few tools perform better.

Tools: choose wisely ~~the~~ just the necessary tools for the agent.

cooperate / collaboration: the ability that various agents have to communicate to each other helps the project to grow with for example, feedbacks from one agent to another.

guardrails: basically maintain the agent "in line" with, to prevent hallucinations and maintain its in the context.

Memory:

short term: Only ~~used~~ during execution.

long term: Memory ~~that~~ that is saved based on previous interactions, and help the agent to learn with the past questions, for example.

Entity memory: Guarda os temas que foram pesquisados, assim ajuda o agente a dar respostas melhores.
